Skin Contact White Wines

These wines were allowed some maceration time, made a little bit like a red wine.

The contact of the grape juice with the skins before or during fermentation promotes extraction of flavours & phenolic compounds that give these wines an extra dimension of colour, body, flavour and texture.

They are great food wines, slightly grippy, aromatic & very flavoursome!

* These Toro Albalá wines are not fortified but were put in this category due to style. The ripeness of the fruit sugars at picking, then the natural evaporation that occurs with long aging, account for the natural alcohol level in the wine.

The wines from Montilla-Moriles cannot be called sherry, even though they can be virtually identical.
